

Expertise that moves the mission forward.

2Prod is a small business based in the DMV area. We build applications, automate workflows, and improve the platforms federal teams depend on. Our engineers work with your technical and program staff to define the work, implement it, and prepare your team to operate it.

CORE COMPETENCIES

01 AI & workflow automation

Knowledge retrieval, request routing, content workflows, and controlled AI actions.

Federal agencies now call AI "Super Intelligence" (SI).

02 Cloud & platform engineering

Cloud architecture, Terraform, Kubernetes, environment automation, and platform operations.

03 DevSecOps & release engineering

GitLab and Jenkins, CI/CD, security and quality gates, release controls, and delivery dashboards.

04 Application & systems integration

Application modernization, APIs, low-code workflows, data integration, and operational reporting.

SELECTED CLIENT OUTCOMES

\$1.8M+

Department savings · last fiscal year

80%

Less meeting time per technology request

AI-powered technology intake

A department-wide AI front door connects related requests, compares existing platforms, and helps teams reuse what they already have.

Platform performance metrics · September 2026

Weeks → hours 70%+

Selected content tasks · early use

Estimated reduction in manual production labor cost

Content generation & maintenance

For a federal client, 2Prod is building a platform that turns source material into a range of content formats and keeps those assets aligned as the source changes.

Platform performance reporting · September 2026

ALMAVAR · OUR ENTERPRISE AI PRODUCT · EARLY DEPLOYMENT

Almavar is 2Prod's enterprise AI product. Deployed inside your environment, it connects agents to approved resources and lets them carry out real work, under your identity, access, and approval controls.

● Self-hosted, in your environment.

Almavar runs inside your own environment, in your cloud account or your data center. Your data never passes through 2Prod.

● The models you already approve.

Almavar works with Amazon Bedrock, Azure OpenAI, Google Vertex AI, or models you host yourself.

● **AWS, including AWS GovCloud.** A one-command installer deploys Almavar to AWS, including AWS GovCloud for federal workloads.

● **In active development.** We can set up an evaluation in your environment.

WORKING WITH US

We contribute architecture, engineering, and delivery depth to defined workstreams within larger federal programs, as a subcontractor and teaming partner.

SECURITY & CLEARANCES

We support contract-specific security requirements and discuss clearance eligibility and security compliance directly with government customers and teaming partners.
